## 1 Install VirtualBox on Windows

Download: [VirtualBox-7.0.6-155176-Win.exe](#)

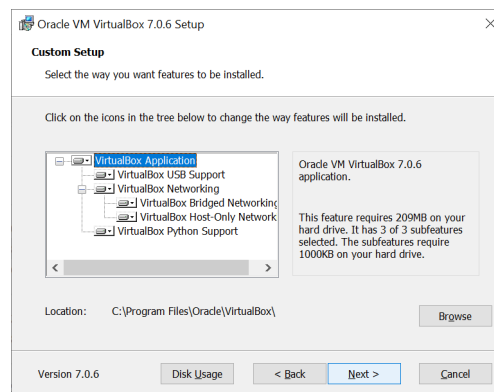

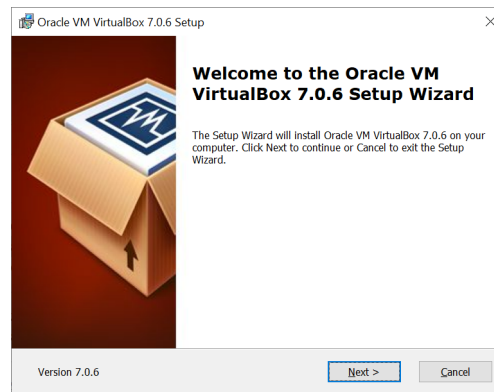

If you get a warning about Microsoft 2019 C++ runtime, install it first and try to install VirtualBox again.

Download: [Microsoft 2019 C++ runtime](#)

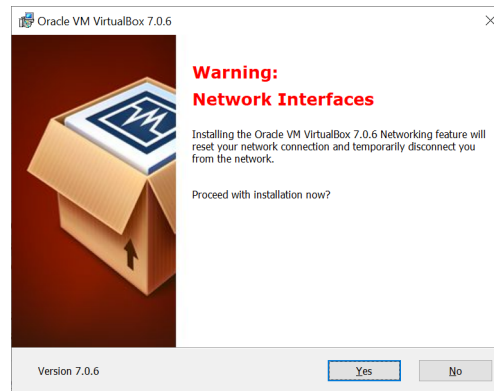

I had already installed Visual Studio Code and suspect this was the reason I didn't get the error message on install of Virtual Box.

### 1.1 Install

Install: VirtualBox-7.0.6-155176-Win.exe

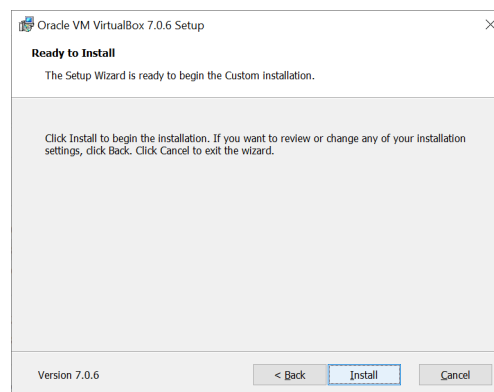

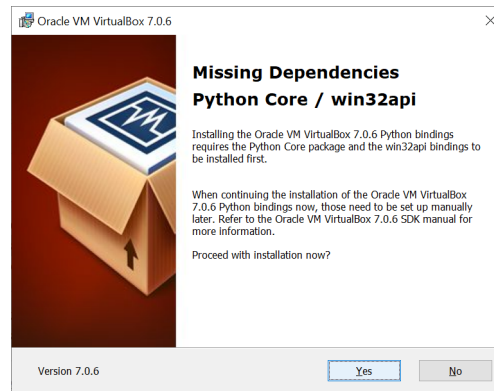

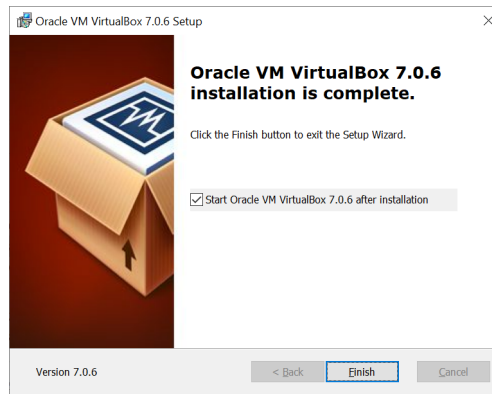

This warning is harmless.

This warning is also harmless.

Possible you don't see this, because you don't have a Python version installed.

## 1.2 Virtual Manager
